DIVISION OF
OIL, GAS & MINING

17 July 1990

Ref: Inspection Report Items, Co-Op Mining Company, Bear Canyon
Mine, ACT/015/025, Emery County, Utah

Pam,

In a letter dated 19 June 1990, you requested that three items outlined in the 6 June 1990 inspection report be addressed. I have discussed these three items recently with personnel from Co-Op and was informed that only one item remains to be closed.

Co-Op is installing a rigid drop tube from the crossover belt to the Hiawatha Coal Bin. This will eliminate the openings experienced with the "drop" made from belting and will effectively eliminate the release of coal fines from this location. This installation is expected to be completed on or before 13 August 1990. If there are any questions or concerns about this requested extension please contact me.

Thank you,

Kimly C. Mangum, P.E.
Permitting & Compliance Consultant.
